

Microsoft® Enterprise Reporting

[BENEFITS]

Mold reporting processes to fit your business

Automate data collection and reporting processes to reflect your business practices. Control consolidations, financial reporting, budgeting, and analysis to provide all your employees with the information they need, when they need it.

Access current, consolidated data

Import data from multiple data sources into the Microsoft Enterprise Reporting database, reducing the need for redundant data entry. Automated checks for updated data ensure that the information you access is always current.

Empower decision makers

Make better decisions by presenting critical business intelligence in a meaningful way. Graphical representations of key performance indicators enable decision makers to visualize trends, patterns, and relationships that impact the bottom line and enhance strategic planning.

Get information when you need it

View, modify, and analyze business data anywhere, anytime via a Web browser. Remotely process or schedule report packages for distribution in a variety of formats, including print or e-mail attachments.

Analyze data more effectively

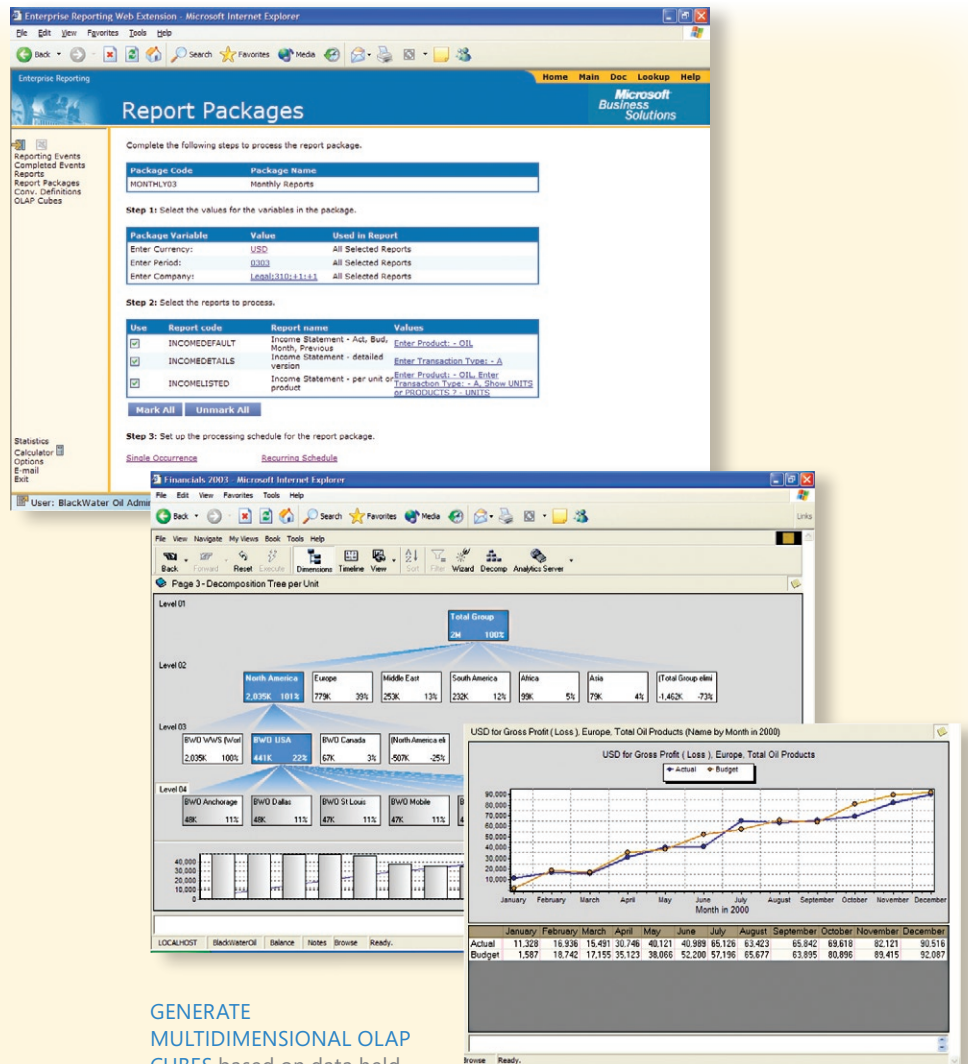

Interpret data using a rich set of data analysis tools including Microsoft® Office Excel® and Microsoft Enterprise Reporting Cube Designer for generation of OLAP cubes.

Integrate seamlessly

Combine the power of two solutions by integrating Microsoft Enterprise Reporting with other Microsoft Dynamics™ GP applications.

Understand your business better and make quicker, more effective decisions by gaining complete control of consolidations, financial reporting, and budgeting across the enterprise.

PROCESS REPORTS TO HTML AND EXCEL formats and schedule for mass distribution using the Report Package Wizard.

GENERATE MULTIDIMENSIONAL OLAP CUBES based on data held in the Microsoft Enterprise Reporting database

[FEATURES OVERVIEW]

Microsoft Enterprise Reporting

Collect and report information from virtually any financial data source across your enterprise organization, as well as integrate seamlessly with Microsoft Dynamics GP applications including General Ledger, Cash Management, and Multicurrency Management.

Streamline group reporting and data consolidation, including advanced multidimensional consolidations, eliminations, and multicurrency translations.

Process reports to HTML and Microsoft Excel formats and easily schedule for mass distribution using the Report Package Wizard.

Analyze provisional enterprise-level financial scenarios for changes in organizational structure without impacting live data.

Archive reports quickly for easy distribution and storage using the expanded directories, which enable automatic generation and management of report directories.

Web Extension

Access and process reports and report packages for any user-defined input variables via the Web at any time, from any location.

Enter data and generate reports using only a Web browser. No installation of the Microsoft Enterprise Reporting application required at remote sites.

Import Server

Automatically import data from multiple sources into the Microsoft Enterprise Reporting database. Ensure data is current and timely with continuous, automatic updates.

Report Server

Free up personal workstations and process report packages on a dedicated server, specifying different output profiles, processing, and distribution schedules.

Excel Add-In

Extend Microsoft Excel functionality to access and analyze current, up-to-date Microsoft Enterprise Reporting data from within this familiar productivity tool.

OLAP Cube Designer

Create OLAP cubes based on Microsoft Enterprise Reporting dimensions, hierarchical structures, and data with an easy-to-use wizard and remotely access cube data through any Microsoft Analysis Services-compatible viewer.

ProClarity

Make ad-hoc queries towards Microsoft Enterprise Reporting OLAP Cubes for custom views of enterprise data with sophisticated drilldown capabilities.

Publish briefing books on the Web, showing multi-dimensional, graphical representations of key performance indicators.

Microsoft Enterprise Reporting is a standalone product, licensed separately from Microsoft Dynamics GP for Analytics.
